

SAY NO TO SMART METERS. 'Smart' meter installers are active in this area, if you have already agreed to have one installed you can cancel by calling them back on the number they gave you or on **01 6985005** – don't let them talk you out of it.

Please read below to find out why you do not want a smart meter in your house, despite what you might have read or seen or heard on state-run/state-funded television and print media. You can legally opt out of 'Smart' meters. The state are installing Smart Meters in homes, schools and businesses, replacing current Electricity meters with wireless meters, to be connected to the 'Smart' Grid. Smart Meters Do **NOT** Benefit the Environment or your wallet or your family or your future.

What's **Wrong** with Smart Meters?

COSTS: Increased bills, rather than promised savings, have been reported worldwide where smart meters are in use. The cost of manufacture and installation of smart meters will be passed on to the customer.

PROFILING to push you out of your home: The Irish political uni-party are talking about putting 5 million unvetted migrants into this country, when we haven't the housing or services to look after the people here. The Government may use occupancy data gleaned from Smart meter monitoring to push elderly people out of their family homes and into smaller units. Or worse, look to force people to accept renters/lodgers. This has been discussed in the Dail and by the heads of all major political parties in the uniparty. Put nothing past any of them them and the big business that controls them. Where are the uniparty Government going to put all of these people they're importing? There is no housing in the country and they aren't building. Half empty homes with elderly or single people living there could potentially be a target.

PULSED RADIATION: All smart meters emit pulsed radiofrequency microwave radiation that is detrimental to health. They can emit up to 190,000 intense pulses of microwave radiation 24/7. A smart meter is a device that transmits your usage data via microwave radiation. You cannot turn it off or change your mind once it is installed.

HARMFUL: Thousands of published scientific studies have shown **harmful biological effects** from this wireless radiation. Effects such as headaches, sleep disorders, fatigue, irritability, nausea, dizziness, nosebleeds, memory loss, concentration impairment, tinnitus and "microwave hearing" have all been widely reported wherever smart meters are installed.

ILLNESS: Long term exposure to this radiofrequency microwave radiation can contribute to serious illnesses such as cancers, depression, Alzheimer's, ME, auto immune diseases and more. Children, the elderly and those with compromised health are most at risk.

CANCERS: In 2011 the WHO (IARC Team) classified radiofrequency microwave radiation from wireless devices, mobile phones, Wi-Fi, mobile phone masts etc. as a Class 2B Carcinogen (the same category as DDT, lead and chloroform).

NOT GREEN: Trees, plants, animals, birds and bees are all damaged by radiation from smart meters. Millions of new meters need to be manufactured and current analogue meters disposed of. Smart Meters need replacing more often. Smart Meters will be on constantly and transmitting data frequently. Connection to the Smart Grid will utilise more electricity at base stations and data centres. **Smart meters will not help cure the over-sensationalised notion of man-made climate change, which is primarily a tax-revenue generation exercise for the Uniparty Irish state.**

NO PRIVACY: Data about your private usage is collected using smart meters and can be sold to marketing companies. Your private data and home security are vulnerable to hacking.

Continued overleaf...

NOT SAFE: Smart meters have exploded and caused fires. They have also been shown to interfere with other sensitive electrical devices, such as **heart pacemakers**.

What Can You Do?: - ESB HAVE CONFIRMED THAT YOU CAN OPT OUT

Telephone 01 6985005 or 1800 928 123 to opt out or cancel. Do it today Follow up with an email toesbnetworks@esb.ie (you will need your MPRN number from the meter). Send a Notice of Non-Consent if you have time. For more information see: <https://es-ireland.com/refuse-a-smart-meter/> Inform your family, friends and neighbours, pass this info along. Even if you do not have a smart meter on your property, the radiation and dirty electricity from smart meters in your neighbourhood can adversely affect you and your family.

FIND OUT MORE : www.es-ireland.com www.irelandforsafetechnology.com www.ehtrust.org
www.stopsmartmeters.org.uk www.bioinitiative.org

Also, use your mobile phone to join the **free Telegram app** in the app store for real information. When you download it, search for and join free channels such as 'Lawyers for justice, Ireland' (15,500 subscribers) and 'Tracey O'Mahony' (19500 subscribers), 'The Irish Git' (17,264 subscribers).

All of those Telegram channels are free, no one is asking you for any money for this information above, or selling you an alternative to Smart meters.

You cannot trust the Irish state, do your own research and make your own decisions, and get involved. If something is for free, then you are the product. Pause the installation for now, you can always get one in future if you change your mind, but if you install one now, you'll never have the option again.

Do not let them talk you out of the cancellation, the people you'll be calling are working on commission.

SMART METERS ARE NOT MANDATORY - SMART METERS ARE NOT SAFE - SMART METERS ARE NOT FOR YOUR BENEFIT, SO OPT OUT.

The meter you currently have works just fine.

Sincerely yours, a concerned neighbour.
