

THE IMPORTANCE OF USING CASH

Cycle Paths & Digital Control Grid, Government Digital Wallet App,
2027 Digital Euro, Censorship on Covid-Jab Deaths in 2021

When we understand the mechanisms behind card/app payments, we understand that cash is our power to do good. Informed people who work with paying customers have a particularly powerful opportunity to spread the word.

Our world is controlled by a cartel of mega-wealthy and unnamed individuals, the 1%. This cartel steers global organisations, such as the United Nations, and all politicians, as well as most corporations, such as BlackRock. These unseen rulers have sneaky plans to depopulate the world and to build an invisible, **digital control grid on all life**. They want a sinister New World Order. They control all media and most of the accounts posing as anti-establishment. If news is viral it is controlled.

The plan is to replace human activity with digital, robot and AI systems. They have worked for decades to fracture and to destabilise society, to programme us to lose faith in human nature. But this plan has major weaknesses: digital networks require massive amounts of energy and data, the systems can be hacked or broken, and they need huge amounts of data on our personal behaviour. Data is the new gold, don't give away your gold. Practicing digital hygiene is our power to do good.

This is the 5th Industrial Revolution, and replacing human workers with AI will bring huge changes to society. The World Economic Forum, WEF, is a globalist think tank where leaders talk openly of changing our society, of eliminating 'useless eaters', making us into '**hackable humans**'. They state that elections are unnecessary because they can predict voters' preferences. Leo Varadkar was a WEF Young Global Leader, many other politicians and Irish public figures attend WEF meetings.

Everyone has a digital twin. Children's digital twins start in the womb, with pregnancy scans. The 'cloud' to which we upload data is a massive computer controlled by others. Corporations spy on us and harvest data with QR codes, apps, gaming, FitBits, Alexa, facial ID for phone access. Revolut has account holder's photos, and promotes selfies for verification purposes. Schools and colleges collect personal data on students. The GAA uses mini-GPS devices on players. Health & fitness data is vital for military conscription, rulers want to remove Irish neutrality.

When you view information digitally, your emotional reactions are measured, e.g. by your blinking rate or typing speed. This data is used to profile your core values and beliefs. Rulers can cluster people with similar values into groups and predict how they will react to events. This is a new era in history, where rulers can see inside our minds and to use algorithms to target us with content that programmes our thinking without our realising this. We give rulers our data to socially condition our world.

When you visit a website, a 'ping' of data, your location and device, is sent to an auction where advertisers automatically bid according to your profile. The highest bidder wins, and you are shown their advert. This is done in milliseconds.

DATA IS THE NEW GOLD

In 2020, Mr. Trump introduced Operation Warp Speed for the Covid injection, which normalised a government-issued Digital ID, for a private medical matter, that we showed to strangers to gain access to standard activities (COVID = Certificate Of Vaccination ID). In June 2026, Ireland has an estimated 30,000 extra deaths since the injection was rolled out. **Up-to-date statistics visit: Irelandexcessdeaths.com**

There was military-grade censorship on Covid-jab harms in 2021. Personalities with PR skills became online stars in anti-Covid groups. They converged with nationalist leaders on a separatist attitude towards the jabbed masses. They shunned jab victims and refused to inform the general public. During 2024 elections, most candidates played dumb on the injection truth. This is unfathomable evil.

Pfizer's revenue for 2022 was \$100 billion. GPs and pharmacists earned huge profits. The truth is extremely disturbing, and that is the goal, to get us to lose faith in human nature, and ready to accept AI-led medicine and governance.

There are AI-led cancer vaccines, permitting external agents to programme human cells. The USA has pegged a crypto (stablecoin) to the dollar, and they are working with Israel for world domination with AI technology and weaponry (Palantir corporate manifesto, technofascism). Tech billionaires have developed robot wombs, and a digital living sphere to fuse with human bodies that carry nanotech transmitters: the Internet of Bio-Nano Technology, IoBNT.

The purpose of new roadworks and cycle paths is to create infrastructure for the digital control grid, 15-min neighbourhoods (Agenda 2030) a surveillance zone, geo-fenced to a 15-min radius, where everyone is monitored by cameras and smart tech. SMART = Surveillance, Monitoring And Reporting Technology. In 2020, movement was restricted by lockdowns. In future, carbon guilt, climate propaganda (weather modification) or fuel supply problems would create an excuse for energy lockdowns, to limit movement within the prepared 15-min zones. This is bio-digital surveillance society for totalist control of human life. But the system cannot work if we don't yield our personal data. Card/app payments are so convenient, it's hard to break the habit, but using cash opts us out of the digital control grid. This is how we can practise digital hygiene, this is a simple way for us to take back our power.

Many people are struggling financially, and when rulers introduce digital money with incentives, we might forget that our digital money can be remotely controlled. Imagine a scenario where you refuse a HSE medicine and the government blocks your digital money. The European Central Bank launches Digital Euro in 2027.

The Irish Government Digital Wallet App, is a mini digital twin with official data, health, driving license etc. In future, if your app shows that your organs can be easily harvested after death, paramedics might prioritise interventions to preserve organs.

A small sign at the till 'Cash is Care' is powerful. Irish people have fought oppression before, we are friendly and talk a lot, everyone can do their bit by chatting about practicing digital hygiene, or handing out flyers in our communities.
